

Certificate of Approval

This is to certify that:

Greenham Tasmania Pty Ltd
Bacon Factory Road
Smithton, Tasmania

has developed and implemented the following supply chain quality assurance program:

GAP Producers Group (Cape Grim)

The scope of the certification includes:

The production of Cape Grim branded beef products sourced from GAP certified Farms under a management system that includes cattle and meat specifications which ensures freedom from GMO & HGP, Antibiotic and Chemical Residues. All cattle are traceable from birth. A detailed scope is set out in the attached schedule.

This scope is limited to the details set out in the attached schedule.

<i>Current Certificate:</i>	01 July 2020
<i>Certificate Expiry:</i>	30 June 2021
<i>Approval Certificate No:</i>	AM200108

18 June 2020

Dated this day

A handwritten signature in black ink, appearing to read 'I.C. King', is written over a horizontal line.

Ian C. King,
Chief Executive, AUS-MEAT Limited

Certificate of Approval

The scope of the certification for the program: **GAP Producers Group (Cape Grim)**

The GAP Producers Group (Cape Grim) Program includes the specification and traceability of cattle through the Production, Transportation and Processing sectors.

Cattle are produced under a management system that includes:

- Accreditation under the Cattle GAP 5-step™ Animal Welfare Program, Step 4 Rating minimum.

*Scope of the 5-step™ animal welfare rating program
The intent of GAP 5-Step™ Animal Welfare Program is to improve farm animal welfare by substantiating compliance with the standards through independent third-party verification. Currently, the standards cover on-farm and transport components of animal production.*

GAP writes and develops standards and accredits Certifiers to conduct independent, third-party on-farm audits to the 5-Step™ Animal Welfare Rating Standards.

- Registration as an MSA Producer.

Greenham Additional Addendum:

- 100% Grass-Fed
- No Added Hormones
- No Antibiotics Ever
- Free Range – Never Confined to Feedlot
- Free from Genetically Modified Organisms
- Meat Standards Australia Certified
- Cattle must be Lifetime Traceable from the property of birth through to slaughter

Cattle are processed at the Greenham Tasmania export registered processing facility at Smithton, under an AQIS Approved Arrangement and an AUS-MEAT Accredited Production Program. In addition, product will be subject to:

- Procedures for post-mortem checking of HGP free status.
- ID and traceability requirements of meat processing QA programs.

Approval Certificate No: AM200108
